CARBON FOOTPRINT
CARBON FOOTPRINT ESTIMATE
We calculate an event's carbon footprint based on meeting space, accommodation, and catering.
Your estimated footprint is:

23.36 tCO₂e

WHAT IS IT?

Carbon Disclosure allows you to see your event's carbon footprint at a glance, the footprint of each venue in our database, and understand the impact of your whole event programme.

When you make an enquiry, we will generate your footprint across meeting space used, catering, and accommodation. Plus, we'll break down the carbon footprint per person, based on your choices.

On our online platform, MeetingsHub, you can access your event carbon footprint at any time - as well as the footprint of your entire event programme.

HOW DOES IT HELP?

Once you know your impact, you can lower your emissions.

Target the areas where your footprint is highest. For example, change your catering requirements, choose a different venue, or consider a different meeting configuration.

Once you know your impact, you can also offset your remaining carbon footprint. We can help you here too – we have access to a variety of accredited offsetting projects. Find out more about offsetting by contacting us today.
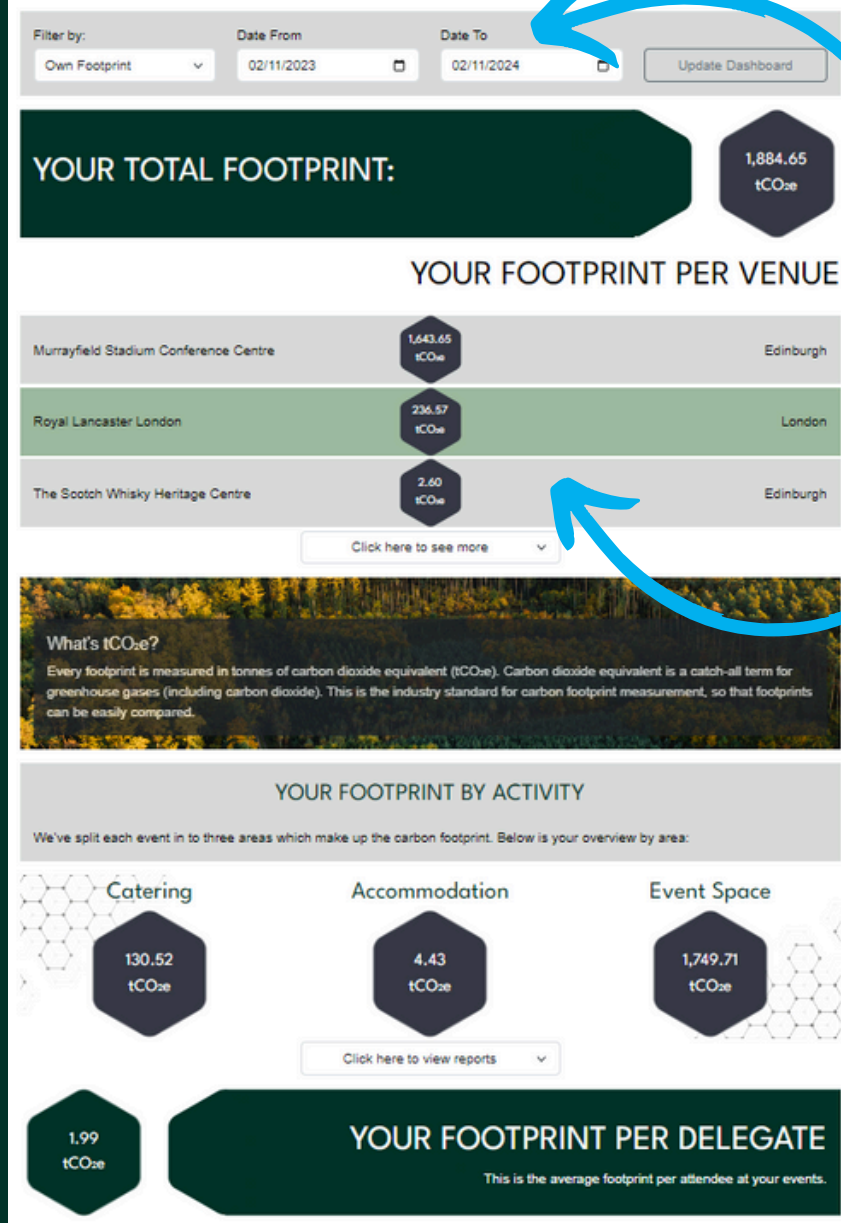

WHY US?

We are the only ones providing this level of clarity and transparency on your event carbon footprint. You won't find this level of detail anywhere else.

With this information, you can:
- Add value to your enquiries and bookings, with no extra work
- Understand your biggest carbon contributors
- Plan better for your sustainability or net zero goals
- Enhance your event programme

YOUR TOTAL FOOTPRINT:
1,884.65 tCO₂e

YOUR FOOTPRINT PER VENUE

Venue	tCO₂e	Location
Murrayfield Stadium Conference Centre	1,643.65 tCO₂e	Edinburgh
Royal Lancaster London	236.57 tCO₂e	London
The Scotch Whisky Heritage Centre	2.60 tCO₂e	Edinburgh

Click here to see more

What's tCO₂e?
Every footprint is measured in tonnes of carbon dioxide equivalent (tCO₂e). Carbon dioxide equivalent is a catch-all term for greenhouse gases (including carbon dioxide). This is the industry standard for carbon footprint measurement, so that footprints can be easily compared.

YOUR FOOTPRINT BY ACTIVITY

We've split each event in to three areas which make up the carbon footprint. Below is your overview by area:

Catering	Accommodation	Event Space
130.52 tCO₂e	4.43 tCO₂e	1,749.71 tCO₂e

Click here to view reports

1.99 tCO₂e

YOUR FOOTPRINT PER DELEGATE
This is the average footprint per attendee at your events.

FILTERS
Capture all of your events programme, or just a snippet, by using personalised filters.

YOUR TOTAL
Get the overall figure for the amount of carbon dioxide equivalent generated as a result of your events.

PER VENUE
Get a breakdown of your carbon footprint per selected venues for your events.

PER ACTIVITY
Receive a breakdown of your carbon footprint via 3 key activities: catering, event space & accommodation

PER DELEGATE
Find out how much carbon dioxide equivalent your attendees have generated.

HOW DO WE DO IT?
The carbon footprint data for each enquiry is generated using the most up-to-date carbon emissions factors from DEFRA, CIBSE and other reputable sources, and produces a number in tonnes of carbon associated with each part of your event. Our sources, calculations & methodology are verified by carbon footprint limited.

We also include key factors such as the energy efficiency of the venue and their sustainability credentials, to see where you could be saving carbon emissions.
